Laser Marking Machine Full-function Protective Cover Pro

More Convenient and More Comprehensive

Full-function Protective Cover Pro - Born for innovation. Integrate the new design concept, realize the efficient function transformation mode of "One host + N function cover = N model". It solves the problem of the diversity of users' requirements in the marking process, and reduces the high cost of the previous customized models. The Full-function Protective Cover also features a fully enclosed design, built-in lighting and a large air volume fan, ensuring a brand new marking experience for you.

**Manufacturer

after-sales service**

Easy installation

It can be installed with just four screws and is ready to use immediately.

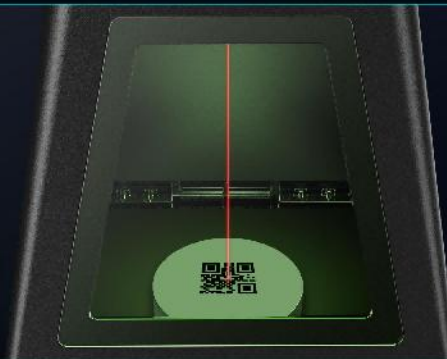

Enclosed design

- Noise reduction and mute
- complies with multiple national standards
- High security. Prevent laser leakage and safeguard user safety

Visual design

Built-in lighting and transparent window design, can be real-time observed marking process, understand the marking progress, improve the marking efficiency.

Multiple functional extensions

One cover with one function, easy installation, fast switching, flexible and multi-purpose.

laser marking machine Full-function Protective Cover Pro Series

Powerful Performance, Various combinations

▼ Fan and Lighting Version

▼ Slide Extension Version

▼ Electromagnet
Adsorption Version

▼ Distance Sensor Version

Fan and Lighting Version

NEW
UPGRADE

Easy connection

Plug and work,
save time and effort

Clear vision

Built-in lighting function,
easy to observe the marking process

Simple control

One click to
start the fan

Surging air volume

Quick exhaust smoke and dust,
Protect the lens, Extend lens
working life.

Electromagnet Adsorption Version

NEW
UPGRADE

Easy connection

Plug and work,
save time and effort

Simple control

One click to start the fan
and electromagnetic
adsorption function

Strong electromagnetic adsorption

80kg Magnetic
attraction, safe
adsorption and
easy operation

Aluminum alloy material

Quality materials,
sturdy and durable

Slide Extension Version

NEW
UPGRADE

Easy connection

Plug and work,
save time and effort

Long distance marking

Long distance continuous marking
can be achieved on any plane

Extended rollers

Easily switch long distance
continuous marking and
static marking mode

Aluminum alloy material

Quality materials,
sturdy and durable

Distance Sensor Version

NEW
UPGRADE

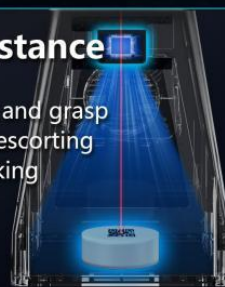

Easy connection

Plug and work,
save time and effort

Sense of distance

Precision capture and grasp
marking objects, escorting
the safety of marking

Simple control

One click to
start the fan

Surging air volume

Quick exhaust smoke and dust,
Protect the lens, Extend lens
working life.

New Protective Cover Upgrade Enable More Comprehensive Mode
